

## Henchman Professional Platform Tripod Ladders—Fully 3 Leg Adjustable

All of our Tripod Ladders come with a wide Platform step from which to work which safely supports the whole foot leaving the top 3ft of the ladder to lean against. It also allows you to tuck your knees in, increasing your stability and brace yourself against the inside of the verticals.

The feet are also designed specifically for soft ground and greatly reduce the risk of slipping or sinking. Their width spreads the weight and inverted cup design grips the ground. For slippery surfaces they can be fitted with optional rubber shoes which also work well to protect flooring when used inside.

If you are faced with steps and banks, the Fully - 3 leg Adjustable Professional version comes into its own. With an adjustability of 18 inch (46cm) on each leg the Platform of the ladder can then be made level on more challenging terrains.

The whole ladder is made of high grade aluminium, fully welded under ISO 9001-2000 conditions. The professional version is designed for a 150kg maximum safe working load. In spite of this the Tripod Ladder is surprisingly lightweight. This makes carrying, transporting and storing, a job for one person and makes using it the simplest of chores.

### The main features of the Fully Adjustable Aluminium Tripod Ladders are:

- Three adjustable legs allow for level and stable steps on very uneven or sloping terrain.
- Uniquely, all Henchman Tripods include the 7 inch deep Platform rung for safety and comfort
- Tuck your legs in, gain added support against your thighs, without hitting shins on rung above
- Top rail for one-handed support whilst working; or for leaning against whilst using both hands
- Wide, clawed feet are designed to grab soft ground and so prevent slipping or sudden sinking
- The 3-leg milking stool principle makes it impossible to wobble and extremely difficult to topple
- Narrow top and third leg for access to tight awkward spaces.
- Incredibly light for ease of carriage and storage
- Rubber shoes can be purchased for added grip and no scratching inside or on hard slippery surfaces
- Uniquely broad range of height options. Available in 6ft to 12ft sizes.
