The LIFT system was introduced to the welded product range in 2004 as a result of popular demand and to satisfy the need for a smaller industrial tower for smaller access solutions.

- Base can be used alone or increased using extra components to achieve 7 additional heights
- Manufactured, tested & certified to BS EN1004-1:2020
- Fits easily into most small vans or estate cars
- Quick and easy to erect - saving time on each job
- Narrow width - compact & easy storage
- Spring-loaded claws on all bracings
- Smooth & ribbed texture on braces for quick identification
- 3T compatible
